

OVERVIEW

This third convening will explore the relationships and effects of migration issues upon racial and ethnic identity and health equity. These migration issues, such as internal migration, generational status, documentation, and acculturation, affect people, households, and communities across lifespans and ancestry. The issues are captured to varying degrees in health and surveillance data sets, and they have complex relationships to people's identity, connection to society, and health.

WEDNESDAY, JUNE 28

- 8:30 – 9:00 am** **Registration & hot breakfast**
